

When running Internet Explorer and accessing Webmail from home, some users encounter problems with the built-in pop-up blocker stopping spell checks and sometimes getting a “You are Not Authorized Error” after clearing a dialog box.

This document describes a one-time procedure to eliminate the errors by adding wlc.edu to your personal list of trusted sites.

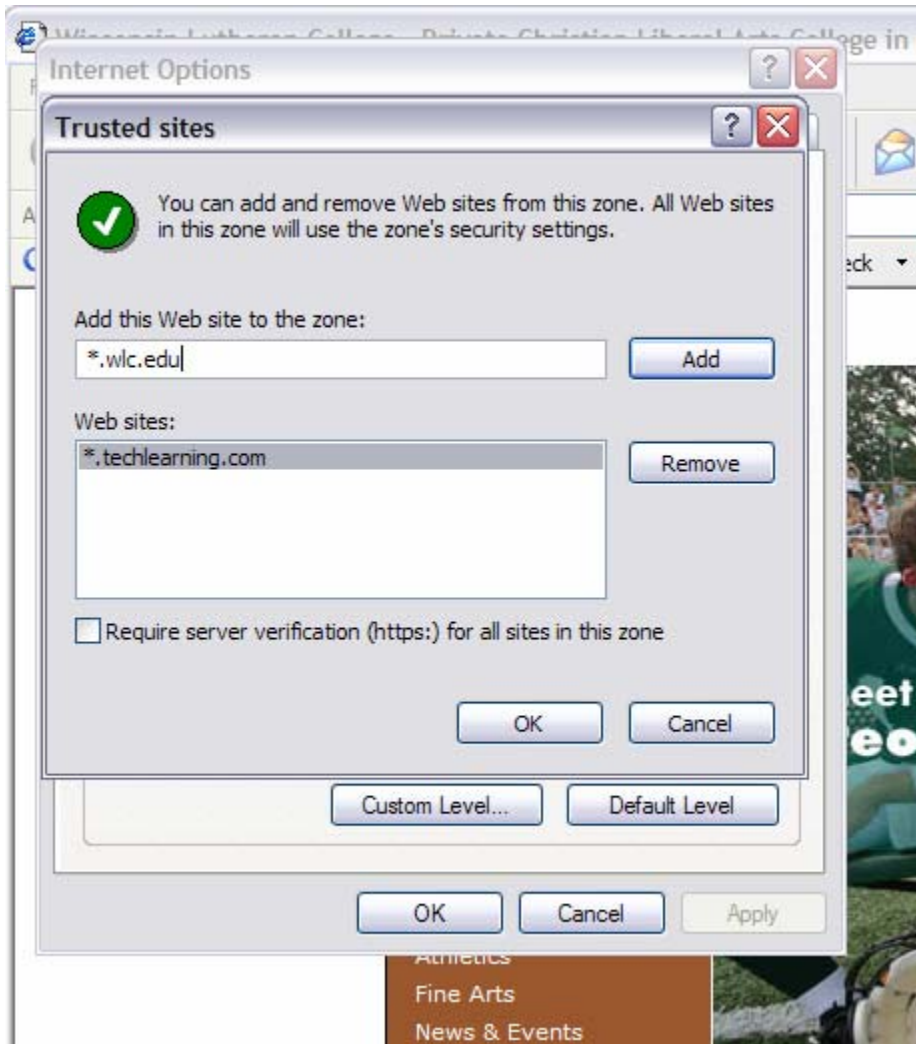

Open Internet Explorer and select Tools: Internet Options...

Click on the SECURITY tab, TRUSTED SITES, and click on the SITES button.

Turn OFF the “Require Server Verification...”
Enter *.wlc.edu and Click ADD as in the diagram below and then click OK.
